RE: Building C Closure Notification
Clean Harbors Kansas, LLC
2549 N New York Avenue
Wichita, Kansas
EPA ID No. KSD 007246846

Dear Mr. Hossain and Ms. Jump:

In accordance with the requirements of the Part B Permit, please be advised that Clean Harbors Kansas LLC., is hereby providing your Departments with notice of our intent to close Building C. Building C is listed in the current RCRA Permit as a container storage unit. All hazardous waste and hazardous waste residues have been removed from the containment system in accordance with the procedures of the Closure Plan-Section J.

Sampling will be conducted as per the Closure Plan with changes, as submitted, to allow for the concrete floor to be disposed as waste and the metal building shell to be recycled following acceptable sample analytic results. The approved procedures and values currently being used for the closure of Buildings B, D, and J in the Sampling and Analysis Plan (SAP) and the Quality Assurance Project Plan (QAPP) are also the basis for the closure of Building C. The building is being removed to facilitate the removal of underlying contaminated soils. The soils remediation is being conducted under an Interim Remedial Measures plan overseen by the EPA.

If you wish to discuss this closure, please do not hesitate to contact Mr. Martin Smith at 417-358-0826 or me at 669-800-7958. Your favorable consideration is appreciated.

Sincerely,

Lon Stewart, P. E.
Sr. Compliance Manager
